

DryPac

- high absorption cloth technology

High cleanability

DryPac is developed to provide you with the highest possible dry cloth cleanability whilst still maintaining a low cost per wash. This means that our specially developed cloth styles are designed for top performance. DryPac is not a standard off-the-shelf product; years of development is put into this Baldwin solution.

DryPac is specially developed for the Baldwin Impact Fusion Impression-ON washes.

Minimized waste

DryPac gives the lowest possible waste due to its fast wash during production.

Quick wash time

DryPac enables the fastest washes in the market.

Safety requirements

DryPac is conformed to the BG ETEM and European safety regulations for all Heatset dryers.

High stability

DryPac has increased stability which eliminates all necking in, folding and delamination of the cloth.

Low environmental impact

Using DryPac enables low wash time which minimize the waste.

Support

Thanks to Baldwin's unique service offering, customers can benefit from process specialists' expertise covering process know-how, hardware, software, and related consumables.

DryPac advantages

- Fulfills all safety requirements for Heatset dryers
- Lower wash time and less waste
- Higher stability - no necking-in or wrinkles

Baldwin's unique capabilities

Optimization package

- Full inspection of all the essential functions
- Calibration and correcting
- Service/parameter adjustment of your Baldwin blanket washing equipment

Annual inspection

- Full product support
- Baldwin experienced field engineering visit on site
- Optimization of wash program
- System check
- Process know-how - hardware - software - consumables

The new DryPac cloth benefits

- Improved stability:
Eliminates all kinds of necking in, folding and wrinkles.
- High absorption capacity:
Enables high speed picking of ink and lint.
- Less cloth consumption:
Due to new more efficient cloth.
- Lint free:
No loose fibers on the blanket after the wash.
- Higher cleaning effect:
Due to new more efficient cloth with its improved and high absorbent compounds.

All above result in a **faster wash** and **very low start up waste**.
